OFF OFFICE ACTION ON THE FOLLOWING	

Serial Number: 08/620,482

Art Unit: 1308

Claims 8 and 9 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regards as the invention. The claims depend from a canceled claim (i.e. claim 7), and are therefore indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6, 9-13 and 16 are rejected under 35 U.S.C. § 102(b) as being anticipated by Teng et al. (U.S. Patent No. 3,788,984, hereinafter "Teng '984"). Applicants should note that Teng '984 subjects a lignocellulosic material such as sawdust (col. 3, line 35) or paper (col. 3, lines 39-40) to esterification with acetic anhydride (col. 2, line 61); and since this procedure appears to be identical to that used by Applicants to produce their product (see page 3, lines 11 and 29 of the specification), the reference material is deemed to be patentably indistinguishable from the material recited in the claims of this application.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

Serial Number: 08/620,482

Art Unit: 1308

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 3, 4, 8, 15, 17 and 22 are rejected under 35 U.S.C. § 103 as being unpatentable over Teng '984. The reference discloses the claimed invention with the exception of the weight gain of the treated material (claims 3 and 4), the type of lignocellulosic material employed (claim 8), the type of oil removed (claims 15 and 17), and the physical form (i.e. sheet) of this material (claim 22). However, the exact weight gain of the reference material after treatment, its type and physical form, and the exact type of oil removed are not seen to materially affect the overall results of the recited process or product, or to produce any new and unexpected result; and are therefore deemed to be obvious matters of choice, which are insufficient to patentably distinguish the claims.

Claims 14, 20, 21 and 24 are rejected under 35 U.S.C. § 103 as being unpatentable over Teng '984 in view of Fahlvik. The

primary reference discloses the claimed invention with the exception of the outer covering for the modified plant material. Fahlvik discloses encasing a cellulosic oil absorbent material in a mesh covering. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the modified plant material of the primary reference with the covering of the secondary reference, in order to facilitate handling of this primary reference material.

This is a continuation of Applicants' earlier application S.N. 08/050,060. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds or art of record in the next Office action if they had been entered in the earlier application.

Accordingly, THIS ACTION IS MADE FINAL even though it is a first action in this case. See M.P.E.P. § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
